

REGAL

2015 BUICK

WHEN WILL YOU KNOW YOU'VE FOUND
YOUR KIND OF LUXURY?

WHEN CURVES ARE YOUR CRAVING

Design, performance, technology and safety: In the highly competitive world of sport sedans, you've got to deliver across the board. In Buick Regal, you'll sense an intensity reflected in the available LED illumination of its wraparound headlamps and taillamps. Regal GS and Regal Turbo models are available with All-Wheel Drive (AWD). Combined with an electronic limited-slip differential, AWD helps maximize traction by sending power to the wheel(s) with the most grip. And on Regal GS, put its class-exclusive Interactive Drive Control System in GS or Sport mode, and Regal GS adapts its available AWD to send more of its torque to the rear wheels, enhancing the performance driving characteristics expected from a GS.

Vehicles shown may contain optional equipment.

CRYSTAL RED TINTCOAT

REGAL GS

BLACK DIAMOND TRICOAT

A silver Chevrolet Regal Turbo is shown from a rear three-quarter view, driving on a two-lane coastal highway. The car is in motion, with a blurred background of a sunset over the ocean and rugged cliffs. The sky is a mix of orange, yellow, and blue. The car's reflection is visible on the wet pavement.

WHEN PRECISION PROPELS YOU

A 259-hp 2.0L Turbo DOHC DI 4-cylinder engine delivers 90 percent of its 295 lb-ft peak torque from 3000 rpm to 4000 rpm for power on demand. It's the kind of low-rpm punch that makes pulling away from stoplights a guilty pleasure. Need to accelerate up a freeway on-ramp and merge into the traffic flow? The engine's twin-scroll turbo design pours on the torque as you reach highway cruising speeds.

QUICKSILVER METALLIC

WHEN ELECTRICITY ASSISTS YOU

eAssist is a fuel-saving engine technology available on Regal. As the name implies, it uses a compact electric motor/generator and an advanced lithium-ion battery to assist Regal and its 2.4L DOHC DI four-cylinder gasoline engine by conserving fuel in certain situations. When Regal brakes to a stop, such as at a red light, eAssist switches its power source from the gasoline engine to the electric motor. It returns to gas power the instant the driver's foot leaves the brake pedal. eAssist also captures and stores energy in the battery as you coast or brake. This energy is used to run accessories when Regal is stopped with the engine in auto stop mode. When needed, the stored energy also powers the electric motor, increasing the horsepower and torque of the 2.4L engine for enviable fuel economy of 25 mpg city and 36 mpg hwy.¹

WHEN THE FOCUS IS SHARP

Slip behind the wheel of a Regal GS and you'll quickly realize this is a driver's car. You'll notice buttons centered atop the dash marked GS and Sport. They're part of the Interactive Drive Control System, available on Regal GS. Two driver-selectable modes — Sport or GS — adapt the ride and handling of Regal GS to your driving style in real time. At high speeds, steering, suspension and transmission adjust to optimize stability during sweeping curves. In GS mode, the system tightens handling response even further.

WHEN THE FEELING IS REFINED

Take one look at Regal and let your eyes wander a bit. Signature headlamps and chrome accents draw you in while Regal's athletic lines guide your eyes all the way back to the wraparound LED taillamps. Step inside and you'll quickly sense that what you're about to drive hasn't just been engineered — it's been crafted. From surfaces to shapes to textures, every nuance of Regal's design makes you feel comfortably in command. Take a thorough test-drive in a Regal, and get to know Buick.

FORWARD COLLISION ALERT

SIDE BLIND ZONE ALERT

Regal offers a full suite of safety innovations. Available FORWARD COLLISION ALERT notifies the driver of a potential collision with a vehicle ahead. If necessary, available FRONT AUTOMATIC BRAKING can even automatically apply the brakes if it detects you may not be reacting quickly enough to this threat. The available ADAPTIVE CRUISE CONTROL automatically adjusts the vehicle speed to maintain a driver-selected following gap to vehicles ahead, even in stop-and-go traffic. LANE CHANGE ALERT is an available feature included with SIDE BLIND ZONE ALERT. Together, they warn you of vehicles in the next lane approaching fast from behind and of vehicles in your side blind zones. And to help you avoid unintentional slow lane drifts, available LANE DEPARTURE WARNING reads the lane markings at speeds above 35 mph. If you haven't put on your turn signal and the system senses your car departs its lane, it flashes a yellow icon to alert you. Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the vehicle Owner's Manual for more important safety information.

REAR VISION CAMERA

WHEN YOUR BACK IS COVERED

Available REAR CROSS TRAFFIC ALERT helps you know something is headed your way when backing up. A camera in the rear captures a view behind the car, while radar sensors detect vehicles approaching from the left or right within 65 feet. The system alerts you with an audible “beep” and by flashing a warning signal on the REAR VISION CAMERA screen.
